Fighting for Compromise

There is adjouger iny disposition to conce if the fact that the free silver men will control the Chicago convention The evidence of silver strength is too

Mr Whitney and his party, including John E Russell and William E Russell, arrived this afternoop and Mr Whitney, it a meeting of the gold standard Densirals at the Andhorium to night, organized their campaign for the Cleveland Democrats here in 1892. Sub-committees look after every delegate and every detail, with a view to keeping the pilitoriam decent, even though he recognizes that it will declare for free, independent and unlimited consign, and with a serial dary purpose to hive something to any about the nominee.

The above paragraph places the stamp of insuccepty on the Whitney compuler If, as some of the Democrats now claim, the currency question is the one great issue before the people it follows that it chie interest of a safe solution of the problem that both parties epecifically declare themselves concerning it. This the Republican party has done. The St Louis platform is as clear is sunlight. What then is to be garper', assuming that Mr Whitney is honest in his protestations in support of sound money, if he succeeds in concessing in the Chicago platform the real attitude of the Democratic party | If the t party could possibly secure a victory in the coming campain, it would a free silver vie orv, and Mr. Whitney has declared hat free silver means National disaster If Mr Whitney thinks more of the Democratic party than he does of the country - welfare his cour e as suthined by the Herald correspondent is con sigtent, but if he is success in his denand for a cound curicity he will have

nothing to do with such a programme Another fact that idds force to the previiting idea that the so called spund abues men are playing a game of pulities is found in the appearance of Senaor Rill as one of the chief heutenants of the ex-Secretary The New 10rk enator is a very wily politici in and will always bear watching The promi rence he is now assurang in the promised high against silver ha led to subhertion of the following letter willten by him in the December, 1892, to a pronounced eilver man in the West

have been thrown off, is retained in the body, and as it cannot go any place else, more of less of it gets into the blood. That's constipation. It is such a wonderfully simple thing that people do not regard it seriously. They let it run on, let it grow worse, become chronic, and show itself all over the body in fifty ways before they consider it important. Combitipation causes nime-tenths of all human ailments. Its first symptoms do not seem very serious, but even they are very disagreeable. A few of them and sour stomach, flatulence, hearthern, distress after eating, foul breath, coated former, distress hertaches, general lassitude and debility. When any of these symptoms show themselves, you should immediately late for. Fierce's Pleasant Pellets, according to directions. They are tiny, sugar-coated granules, made on purpose to cure buistipation. They do this perfectly and quickly, and they are the only preparation in the world that will do it. There are plenty of medicines that will give relief as long as yon keep on taking them, but you can't stop. They don't cure; they give merely temporary relief. Doctor Pierce's Pleasant Pellets give immediate relief and produced a permanent cure.

Bakuoin was horn in 1844, of an aristocratic family, and entered the Russelu army. He left is at the age of 21 and took up his residence at Moscow, where he devoured the writings of Hegel and Sohupers hour and formed one of a circle of young men, among whom were Katkerf, who became famous as the selice of the Moscow Gazette, and Horres, who was afterward a prominent nibilist. Bakunin was a restless individual, who was never at peace himself, nor would be let others enjoy it. He was a stormy petrol of politics, who delighted in nothing so much as in plets and revolutions. In 1846 he visited Paris, where he imbiled something of the tenchings of Proudhon and George Sand. He was first distinguished as an active Panslavist, and of course took a part in the rovolutions of 1848. For the share he took in that at Dresden he was given up to the Russian authorities, who sent him to Siberia, whomee he succeeded in making his secape. It was not until 1866 that he turned his attention to scolal quest ons. In that year was founded the International Association of Workingmon, of which Carl Marx was the deminating upits. Is was in connection with this association that the two man came into conflict. They agreed that sonjety needed to be entirely reconstituted, but while the socialism of Marx involved more restrictions on liberty than over the snagohism of Bakunin meant liberty running into Illowase.
